

Help Available

for COPD and Asthma Patients

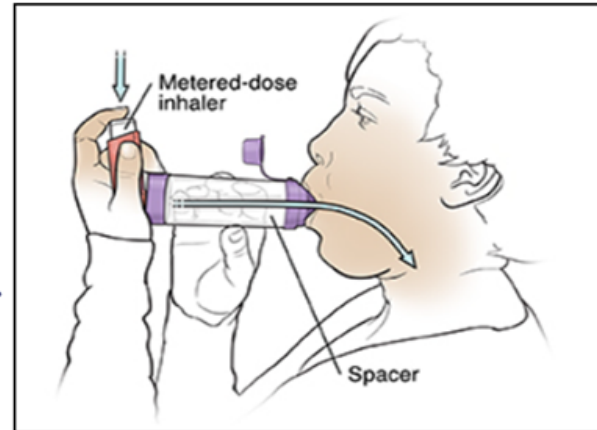

Cheshire and Merseyside

Did you know.....?

That if you are prescribed an inhaler like this
Then using a spacer like this with your inhaler will :-

- Increase the amount of medicine that gets into your lungs
- Help recovery if you're hyperventilating when you have been short of breath and need your inhaler
- Reduce the risk of a severe asthma / COPD attack

Did you know.....?

That you can get one of these spacers from your
local pharmacy without a prescription

(Usual Prescription charging arrangements will apply
- they're free if you don't pay for your prescriptions)

Ask your pharmacist for details

Different types of spacer are available - Your pharmacist
will give you the correct one for your inhaler
